ELEGANT INNER DRAWER SOLUTIONS,
AVAILABLE FROM NESSCO

www.essetre.com.au

About Nessco

Nessco has been importing and supplying furniture hardware products to the Australian cabinet making industry for over 25 years.

With a highly experienced sales team dedicated to hardware, Nessco strives to provide the best quality furniture hardware from around the globe to the Australian market.

ABOUT

Elegant Inner Drawer Solutions

The kitchen is the heart of every home. Creating an inviting and functional space allows hassle-free living, from intimate meals to dinner parties.

With this in mind, Nessco presents the Essetre range of high quality inner drawer solutions direct from Italy. Transform your kitchen into the most practical and stylish part of your home with Essetre.

The flagship of Essetre is the luxurious Gourmet-Line beech-wood range. CNC machined for perfect fit and finish, the range offers drawer inserts complete with stainless steel cutlery, knives, utensils, anti-adherent pots and accessories. In addition, Essetre also offers superior quality wooden trays and modular inserts.

As the exclusive Australian distributor, Nessco is proud to offer the Essetre range.

Please ask us for pricing, further information or samples.

ESSETRE

Italian Style Driven by a Family Passion for Superior Quality

Essetre's superior quality and design is driven by the passion behind the brand. Over ten years ago, Nazzareno Mensà, together with his two brothers, Stefano and Patrizio, began the Essetre business in Cagli, a small town in the province of Pesaro e Urbino, Marche, central Italy. The region is known throughout Italy for its long history of furniture craftsmanship and today it is renowned for manufacturing.

Combining traditional Italian craftsmanship with the finest materials, Essetre's products are the very essence of style and quality. The process begins with a concept that balances ergonomic requirements with aesthetics to create the ultimate design. Thereafter, internal specialists evaluate the finest quality materials, tested for durability and safety. Modern machinery forms perfectly consistent modules, cutlery and cookware items. Each item is then hand-finished by traditional methods of craftsmanship to guarantee perfection.

1 GOURMET-LINE

The Gourmet-Line of lamellar beech-wood drawer inserts are manufactured using CNC machinery to provide each piece its own perfect place. This stylish range comes complete with cutlery, cookware and accessories of the highest quality, all manufactured in Italy using the finest grade materials.

SELECT THE FINEST FIT FOR YOUR KITCHEN

2 EASY-LINE

The Easy-Line range of quality beech-wood timber inserts and accessories provides an aesthetic, functional layout for your own cutlery, crockery and utensils.

GOURMET-LINE

Gourmet-Line Beech-Wood Cutlery Trays with Forged Stainless Steel Cutlery

The exceptional quality beech-wood cutlery trays come complete with a set of neatly arranged 18/10 stainless steel forged cutlery. In accordance with the highest of European standards, all of the utensils are anti-corrosion protected, perfectly balanced and highly durable.

The beech-wood width compensator allows for an extra area of space suitable for serving spoons, bread knives or other utensils. The width compensator is also useful when combining cutlery tray bases to accommodate various drawer widths. As an example, for a 900mm drawer, two base units to suit 450mm width can be combined with a 100mm wide compensator.

Gourmet-Line Beech-Wood Cutlery Tray with Custom Assortments

Custom assortment beech-wood cutlery trays are completed by hand and treated using a natural process. This produces an elegant yet practical cutlery storage solution that is complemented by superior quality forged stainless steel cutlery modules. These modules fit seamlessly into the removable trays.

Each fitted accessory, from the salt and pepper flasks to the teaspoons, is manufactured in Italy to the highest quality standards. Essetre's modular custom assortments are designed for flexible usage, meaning the cutlery tray base can also accommodate your own cutlery.

Gourmet-Line Beech-Wood Knife Racks with Stainless Steel Knives

The luxurious range of beech-wood knife racks comes complete with a fitted range of forged, stainless steel knives. All of the blades are forged in AISI 430 stainless steel and their handles are P.O.M. (poly-oxi-methylene) injected for safety and quality of the highest standard.

The Gourmet-Line beech-wood knife rack ensures that your knives are always in place and ready to use, without cluttering your kitchen bench tops.

Gourmet-Line Beech-Wood Cookware Racks with Anti-Adherent Saucepans and Lids

The Gourmet-Line also offers a cleverly designed cookware rack to fit a variety of saucepans and frying pans neatly into one convenient place. This extremely useful storage display solution prevents the mess and inconvenience of stacking by keeping every item immediately visible and right at your fingertips.

Fitting perfectly into the rack, Essetre's high quality cookware is manufactured from anti-adherent materials, with a Teflon® lining and a thick aluminium base. The non-stick properties make cleaning a breeze and allow for easier cooking, while the thick aluminium base also ensures prolonged durability. Glass lids add to the visual appeal that Essetre is renowned for.

Base & Modules for Easy-Line Compositions

Central to Essetre's Easy-Line range is the superbly designed pierced base, made from fine Italian timber that is smooth to the touch. With its innovative design, the pierced base can support a range of Easy-Line modular compositions.

Each modular composition slides and locks into the base to ensure that everything is kept in place and displayed securely. This practical and functional inner drawer display solution allows you to choose and personalise the spaces inside your drawers. By alternating position of the plate legs and using different accessories the compositions are almost limitless.

Important Cleaning and Maintenance Information

Precautions are essential in avoiding irreparable damage to the articles. Colour samples are purely indicative. Since the materials are natural, their shades are expected to differ. It is important to remember that wood is an organic material, and therefore subject to changes. These changes may be due to environmental conditions and general usage. This does not mean that your product is deteriorating, but only that it is adapting to its environmental conditions.

The customer must therefore follow some simple maintenance rules in order to preserve their Essetre products.

Wood

1. Wipe off any dust with an antistatic or slightly wet cloth.
2. Polish the item periodically.
3. Avoid the use of any cleanser, solvent or abrasive products.
4. Keep temperature and humidity changes to a minimum as these can cause bending and swelling of the item.
5. Avoid contact with water. If this should happen, immediately dry with a parched cloth.

Forged Knives and Cutlery

Each knife model is manufactured for a specific purpose. Do not use the knife for purposes other than that which they are designed for. The blade must avoid contact with hard materials (ceramic, granite, etc.).

1. Do not wash the knives and cutlery in the dishwasher.
2. Hand wash with normal domestic cleansers.
3. Prolonged contact with organic liquids can cause damage.
4. Wipe with a dry cloth after washing.
5. In order to restore the efficiency of the blade, we suggest the use of a sharpener:
 - Keep your elbows at waist height, while holding the sharpener in one hand and the knife in the other.
 - Brush the blade against the sharpener at an angle of about 15°.
 - Repeat this process on the opposite side of the blade.
 - Two to three movements are sufficient for ordinary maintenance and 15-20 movements are required for blunter blades.

Not suitable for the dishwasher

Please check for all minimum drawer space requirements

Stainless Steel Utensils

1. Wash the utensils immediately after use.
2. Always clean according to the glazing.
3. Use neutral cleansers.
4. Avoid brushing the utensils with:
 - Abrasive products, especially if containing chlorine, steel or synthetic wool.
 - Metal tools.
5. Do not wash with hypochlorite, chlorine or other free chlorides.
6. Dry immediately after washing with a soft, absorptive cloth.

Anti-Adherent Pots

1. After washing the pot, pre-condition the internal layer by oiling it with butter or with oil.
2. Always cook at moderate temperatures, being careful not to overheat an empty pot.
3. Use plastic utensils rather than metal ones.
4. Never cut food inside the pot as this can cause scratching and damage.
5. Do not use abrasive materials and chemicals when washing the pots. A small quantity of a neutral cleansing solution that has been diluted in warm water will suffice.
6. Dishwasher use is not recommended for these items.
7. Anti-adherent pots should not be used on magnetic induction cookers.
