

# Walk-in CustomCoolRoom

*The Ultimate in Coolrooms.*

A custom Walk-in CoolRoom is the ultimate convenience in any kitchen or scullery. You will be able to store anything and everything you can in a normal fridge or dry pantry - cereals, cans, meat, fish, fruit, vegetables and even dry foods such as flour and sugar. Plus food will always stay longer and fresher.

A custom Walk-in CoolRoom uses modern fridge technology for low energy consumption, low temperatures and high humidity. It is perfect for large families, buying in bulk, entertaining and keeping platters and salad bowls fresh and crisp.

With over 23 years experience in purely residential homes, our CoolRooms are unique in that they require no plumbing or drainage and hardly require any cleaning or maintenance as condensation never builds up.

*If you are building a new home or renovating, we will work with your designer, architect or builder to ensure that your CoolRoom becomes an integral part of your kitchen or alfresco and not an after thought.*
